## ***Announcement.***

---

The past season was very disastrous to all our vine seed crops, more so than anything we ever experienced before. Selected planting stocks are much reduced, and yet, I very fortunately had nearly two years supply on hand. I therefore wish to announce that I will be able to care for the usual requirements of my customers, except on a few varieties as noted within, but I will not be able to handle a very much increased acreage. I will therefore request that orders be placed as early as possible.

An acreage will be planted of each variety to produce, under ordinary conditions, the various amounts required to fill all contract orders, and in no instance will any carry-over-stock be used to apply on contract orders, unless it may be mutually agreeable to my customers and myself. In case of shortages all orders will be filled by an equal pro rata division of the entire merchantable crop delivered to me by my various growers, all orders being treated alike.

Orders will be accepted for the growing of special stocks or new varieties at reasonable prices if planting stocks are furnished.

The telegraph code used is the same as adopted by the American Seed Trade Association.

Orders for 25 pounds of a single variety of vine seeds will be filled at regular quotations; for orders of less than 25 pounds of a single kind, add 2 cents per pound.
